#### Foreword:

The Supreme Pontiff of Hinduism and the Head of Uniting States of Kailasa, The Living Representative of Paramashiva, His Divine Holiness Bhagavan Nithyananda Paramashivam has formulated KAILASA'S Hindu Compliance System to create, promote, spread and teach the standard procedures for all products and services that are in compliance with Hindu Scriptures. Hinduism has detailed procedures, standards, methodologies for everything. Hinduism is a rich religion with vast choices, It educates and empowers, has a non-restrictive, enlightening and empowering set of Principles to produce and use any product. KAILASA's Hindu Compliance System is working towards recognising the needs of two billion Hindus around the world and therefore works towards compiling the standards, and policies such as - economic policy, religious policy, spiritual policy or strategies or any products and services, as give by Paramashiva in Veda-Agama. KAILASA's Hindu Compliance System will work towards bringing innovation and provide solutions to global challenges by bringing together the various standards, procedures, and guidelines revealed in Hindu Scriptures. Through this System KAILASA will bring together all the experts to compile the standards as per needs of the global hindu diaspora, in accordance with the **\$\frac{8}{2}\$stra(Hindu Scriptures)**.

The procedures used to develop this document and those intended for its further maintenance are described in *makuṭa āgama*.

Attention is drawn to the possibility that some of the elements of this document may be the subject of copyrights. VAS shall not be held responsible for identifying any or all such copyrights. Details of any copyrights identified during the development of the document will be in the Introduction and/or on the HCS list of copyright declarations received.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement. The committee responsible for this document is Hindu Compliance System HCS TC-1, veda-agamic research expert sub-committee 1.

#### Introduction:

This *Hindu Compliance System* provides the fundamental concepts, principles for sustainable solutions for quality control & management (QCM) and provides the foundation for other QCM standards. HCS is intended to help the user to understand the fundamental concepts, principles and vocabulary of quality control & management as per hinduism, in order to be able to effectively and efficiently implement a QCM and realise value from other QCM standards.

This HCS proposes a well-defined QMS, based on a framework that integrates established fundamental concepts, principles, processes and resources related to quality as per veda-agama, in order to help Hindu organizations, Hindu businesses, Hindu Service Industries and the Hindu diaspora around the world to realize their objectives. It is applicable to all organizations, regardless of size, complexity or

business model. Its aim is to increase the organization's commitment to dharma and responsibility in fulfilling the needs and expectations of its customers and interested parties, and in achieving satisfaction with its products and services.

### Scope:

This *Hindu Compliance System* describes the fundamental concepts and principles of quality for making a deity which are commonly followed for all the *śaiva sampradāya* in sanatana hindu dharma. This standard will help organizations, businesses to create the deity with basic proportions and measurements mentioned in Hindu Scriptures which will hold the energy of the deity invoked in this form. This will also be applicable to the following:

- organizations seeking sustained success through the implementation of a standard parameters for sizes;
- customers seeking confidence in an organization's ability to consistently provide products and services conforming to their requirements;
- organizations seeking confidence in their supply chain to ensure that the product and service requirements are met;
- organizations and interested parties seeking to improve communication through a common understanding of the vocabulary used in quality management;
- organizations performing conformity assessments against the requirements of deity making
- providers of training, assessment or advice in quality control & management;
- developers of related standards.

### Fundamental Concepts and Principles:

- The face, neck, navel, heart and thee pubic region should be formed with a measurement of 9 inches (one vitasti), the measurement of chest should be 18 inches (2 vitasti), the portions below the chest and likewise the neck, knee and ankle are to be formed with 3 inches (four angulas)
- 2. The measurement of legs should be 10.5 inches (fourteen angulas); and that of shoulders should be 13.5 inches (18 angulas).
- 3. The palms (hasta tala) are to be formed with a measurement of 5.25 inches (7 angulas).
- 4. The middle finger is to be formed with a height of 3.75 inches (5 angulas), the ring finger and the forefinger 3.375 inches (four and a half angulas); the thumb and the little finger 3 inches (four angulas)
- 5. The thickness of each digit of the middle finger should be about 1.5 inches (2 angulas); that of the ring and forefinger should be 1 13/32 inches (one angula and seven yavas 1 yava is 1/8th of an angula), the little finger 1 5/16 inches (1 angula and 6 yavas). The root middle and top digits of the middle finger should have a length of 1.5 inches (2 angulas), 1.5 inches (2 angulas) and 3/4th inch (1 angula) respectively. Those of the fore and ring fingers should be in a length of 3/32 inch (one yava) less than the previous measurements and those of the thumb and the little finger should be in a length of 3/16 inches (two yavas) less than the previous measurements or,

- the length of the digits of the fore finger be taken as to be equal to that of the middle finger and the thumb.
- 6. The nail of each finger should be a 3/32 inch (yava) more than the half of the length of the top digit of that particular finger.
- 7. Thickness of the digits of the thumb should be about 3 inches (4 angulas); that of those of the middle finger should be one by eight parts less than the thickness of the thumb. Thickness of the digits of other fingers are shortened according to their length.
- 8. The height of forehead is 3 inches (four angulas); nose stem 3 inches (four angulas); tip of the nose 1 11/16 inches (two angulas and one yava); slopes (two sides of the nose) 1 ½ inch (one and a half angulas). Eyes length 1.5 inches (two angulas) and width ¾ inch (one angula); eyeball (tāraka) 3/5th of the lateral measurement of eye droṇa (trough of eye) length, ¾ inch (one angula) and width ¾ inch (half of an angula), lower lip ¾ inch (one angula) upper lip ¾ inch (1/2 angula); chin 1.5 inches (2 angulas); hollow of ear (garta) width of ¾ inch (one angula); ear (karnapāsa) length 3 inches (4 angulas) and width 1.5 inches (2 angulas).
- 9. The height of the portion from the upper part of the neck to the crest should be 9 inches (12 angulas)
- 10. The forehead should have (a lateral measurement) a length of 13.5 inches (18 angulas)
- 11. The circumference of the head should be 27 inches (36 angulas)
- 12. The space between the two breasts is to be formed according to the length of the chest
- 13. The diameter of the nut at the centre of the black circular nipple is 3/32 inch (one yava); diameter of the circular nipple is 3/16 inch (2 yavas)
- 14. Length of the scrotum is 11 ¼ inches (five angulas)
- 15. Length of the penis resting on the middle portion of the testicles is 4.5 inches (6 angulas). Above the portion of testicles (kośa), thickness of the penis must be 3 inches (4 angulas).
- 16. The space between the front portions of knees should be 13.5 inches (18 angulas), thickness of the middle portion of knees should be 15 ¾ inches (twenty one angulas).
- 17. the length of upper arms 9 inches (12 angulas) and that of forearms 12 inches (16 angulas)
- 18. Toes of the legs should be in a length of 2 ¼ inches (three angulas); thickness of the toes 3 ¾ inches (five angulas). The fore fingers of the legs should be 2 ¼ inches (three angulas) in length. Other fingers (excluding the little fingers) should be one by 16 parts less than the length of the toes. The length of each nail should be half of the front digit of each finger. Thickness of the fore finger (of the legs) should be 2 ¼ inches (three angulas) and that of other fingers should be one by 8 parts less than the thickness of the fore finger
- 19. The space between the eyebrows should be ¾ inch (one angula).
- 20. The height of the crown must be 9 inches (12 angulas)
- 21. On dividing the height of an image into 9 equal parts one part should have a measurement of 9 inches or 6 inches (12 or 8 angulas).
- 22. All the images belonging to the group of goblins(vetalas) are to be made with a length not exceeding 18 inches (2 vitastis); those of kinnaras etc should have a height of 63 inches (7 vitastis); those of vamana, kubja should have a height 3, 5 or 7 parts less than the previous measurement.

#### References

The above standards has been taken into consideration from kāmika āgama, uttara pada, vyakta liṃga lakṣaṇa vidhiḥ, which is foremost among the śaiva-agama. At the time of publication, the edition indicated was valid. All the standards are subjected to revision considering that it is compliant to veda-āgama. All the interested parties are encouraged to investigate the possibility of applying the improvements in above standards.

### Terminology and Definitions:

1. Vitasti (वितस्ति): A unit of measurement of distance, according to the Vāyu Purāṇa (वायु पुराण). The following table gives some idea about their relations to each other:

```
1 Vitasti = 8 Angula (finger)
```

1 Angulas = 8 Yava (barley)

1  $Yava = 8 Y \bar{u} k \bar{a}$  (louse)

 $1 Y \bar{u} k \bar{a} = 8 Li k s \bar{a}$  (nit)

1  $Lik s\bar{a} = V\bar{a}l\bar{a}gra$  (hair-end)

1 Vālāgra = 8 Rathadhūli

1 Rathadhūli (chariot-dust) = 8 Paramāņu

mṛgendra āgama vidyā pādaḥ, 13th Chapter, 4th śloka

रजो विलोक्यते तिर्यक् जालाविष्टार्क रोचिषाम्। तदष्टाष्ट गुणस्थाने तृतीये स्यात्कचाग्रकम्॥ लिक्षा युका यवोप्येवं अङ्गुलं तत्रिसंगुणैः।। तैरेव गुणितः पाणिः धनुस्तद्वेद लक्षितम्॥

#### दण्डो द्वे धनुषी ज्ञेयः क्रोशस्तद्विसहरकः। द्विक्रोशमाह्गेव्यूतिं द्विगव्यूतिं च योजनम्॥

rajo vilokyate tiryak jālāviṣṭārka rociṣām ı tadaṣṭāṣṭa guṇasthāne tṛtīye syātkacāgrakam ıı likṣā yukā yavopyevaṃ aṅgulaṃ tatrisaṃguṇaiḥ ı ı taireva guṇitaḥ pāṇiḥ dhanustadveda lakṣitam ıı daṇḍo dve dhanuṣī jñeyaḥ krośastadvisaharakaḥ ı dvikrośamāhurgavyūtiṃ dvigavyūtiṃ ca yojanam ıı

The minute particles seen floating in the rays of the sun which enter through an oblique window are generally known as 'paramanus'. Eight paramanus make one 'trasarenu'. Eight trasarenus make one 'kacagra'. Eight kacagra make one 'liksha'. Eight liksha make one 'yuka'. Eight yukas make one 'yava'. Eight yavas make one angula. Twenty-four angulas make one hasta. Four hastas make one bow(dhanu). Two dhanus make one danda. Two thousand dandas make one 'krosa'. Two krosas make one 'gavyuti'. Two gavyutis make one yojana'. (The extent of brahmanda is calculated in terms of yojana).

### Hindu Compliance System:

Hindu compliance System was established under the executive order of Supreme Pontiff of Hinduism, dated August 14, 2020, order number 10010, under the title *Reviving the Hindu Compliance System and Body for the Whole World* to create, promote, spread and teach the standard procedures for all products and services that are in compliance Hindu Shastra. Hindu Shastra provides vast choices, educates and empowers, is a non-restrictive, enlightening and empowering set of Principles.
